484066 -- Patent information

Published Serial No.	484066		
Title	Network Interface device which allows peripherals to utilize network transport services		
Patent type	B		
Date of Grant	2002/4/21		
Application Number	087109168		
Filing Date	1998/6/9		
IPC	G06F13/14		
Inventor	KUMPF, DAVID A.(US)		
Priority	Country	Application Number	Priority Date
		US19970964073	1997/11/04
Applicant	Name	Country	Individual/Company
	HEWLETT-PACKARD COMPANY	US	Company
Abstract	An input/output device is connected to peripheral equipment. The input/output device includes a plurality of network transport modules. Each network transport module implements a different network protocol. The input/output device also includes a gateway module which is used for communicating with the peripheral equipment. The input/output device also includes a gateway module, which interacts with each of the network transport modules and with the communication mechanism. For each endpoint within an application programming interface (API) module within the peripheral equipment, a corresponding endpoint is implemented within the input/output device. The communication mechanism includes a bus and the API module is used to transport control messages between the gateway module and the API module. For a network transport module which requires data stream communication, control messages are exchanged over the control channel and data stream communication is established via a separate communication channel between the gateway module and the API module
